

## Assignment 3: ePortfolio for Joe Jaguar

### Purpose

Creating the index and about pages for Joe Jaguar's ePortfolio gives you a chance to show the skills you learned in Chapters 4 and 5 and The Pacific Case Studies. You need to apply the skills you have learned to create the Home-index page and the About page for the ePortfolio site. Assignment 3 is worth 50 points.

### Deliverables

- Upload your eport folder containing **index.html, about.html, eport.css, and all images** into assign3 on OneDrive or GitHub
- Update your assignment sheet with a link the the index file of the ePortfolio website.
- In Canvas Assignments submit the link for your assign3 folder.

### Assignment 3 Task Details

Create folder named eport or similar with no spaces or caps in your assign3 folder

- Find appropriate photos and optimize them for use in web pages and save them in your **eport** folder
- Pick two main colors of shades of color for the site.
- Create the Home/Index page for Joe Jaguar E-portfolio web site including:
  - Error free head section with link to external css and title tag- site name/page name
  - Error free body section with structural elements- header, nav, main, and footer
  - Use h1, h2, h3, use the id and class you created in the external css
  - Main navigation links: **About, Projects, Resume, Service and Contact.**
  - Link to About page should work on the home page
  - H1 in header should be a link back to index.html
  - Include at least 3 images- need one background image in css and one using <img> in html
  - Include a list- make sure to include the parent tag of <ul> or <dl>
- Create an external css for your styles
  - Create styles for header, nav, main and footer
  - Create styles for, h1, h2, h3- changing colors, font, background etc- but they should be consistent
  - Create a class and use it in the html
  - Create and id and use it in the html
- Use Save As to create the About Page-the layout and design should be consistent with the home page.
  - The header, nav and footer should be consistent with the index page
  - The main area should have different text and headings
  - . The header should be a link back to home on the About page.

- Put all code, HTML and CSS through validators—for HTML code use [https://validator.w3.org/#validate\\_by\\_input](https://validator.w3.org/#validate_by_input) and for CSS code use- [https://jigsaw.w3.org/css-validator/#validate\\_by\\_input](https://jigsaw.w3.org/css-validator/#validate_by_input) -points will be deducted for coding errors.
- Upload your eport folder to your assign3 folder on OneDrive or GitHub—make sure it contains your Home page(index.html), About page, css file and the images you used.
- Edit your assignment sheet to add a link to the index.html file in your eport folder in assign3- check code with validator.
- Submit the url to your assignment sheet in canvas

Make sure to post any questions in the Assignment 3 Discussion.

For HTML code use [https://validator.w3.org/#validate\\_by\\_input](https://validator.w3.org/#validate_by_input)

For CSS code use- [https://jigsaw.w3.org/css-validator/#validate\\_by\\_input](https://jigsaw.w3.org/css-validator/#validate_by_input)

– you will need to copy and paste your code into the box Validate by Direct Input.

#### Rubric

- Working link to assign3 folder- 5 points
